Port Harcourt, Nigeria · Open to Relocation — Berlin/Stuttgart/Ulm

Frontend-focused full-stack engineer with 6+ years building production React/TypeScript applications — dashboards, admin panels, and customer-facing products across commerce, fintech, and hospitality. Deep React/Next.js expertise (hooks, component architecture, state management), a working design sense honed across multiple client and product UIs, and Jest-based testing as standard practice. Beyond the frontend: hands-on production experience with Kubernetes and Go on the backend, plus a background in industrial IoT/embedded systems — a genuine feel for the kind of sensor-driven, real-time data this role's dashboard is built to visualize.

CORE SKILLS

Frontend

React / Next.js — expert level, hooks, context, component architecture

TypeScript — strict typing, generics, interfaces, enterprise patterns

Tailwind CSS, MUI — scalable design systems, responsive UI

Redux & Redux Toolkit — global state, async thunks, slices

Jest — automated/unit testing for frontend applications

IoT / Domain Familiarity

Embedded/IoT product background (ESP32, sensor telemetry)

Real-time hardware-to-cloud data pipelines

Practical feel for translating sensor/telemetry data into UI

Backend & Bonus Stack

Node.js / NestJS / Express — REST APIs, auth, integrations

Go (Golang) — microservices, real-time systems

Kubernetes — production deployment, orchestration, scaling

Docker, CI/CD — GitHub Actions, GitLab CI

Workflow & Collaboration

AI-assisted / agentic development — Claude Code, GitHub Copilot

Code review, design collaboration, engineering standards

Cross-functional work with backend, data, and product teams

Team leadership — 5+ engineers, mentoring

EXPERIENCE

Luply — *Founder & Engineering Lead* 2019 – Present · Remote

<https://luply.com>

- Designed and built the customer- and admin-facing frontends for a four-platform commerce suite (POS, marketplace, food delivery, logistics) in React, Next.js, and TypeScript, including real-time order and delivery-tracking dashboards.
- Owned the full frontend architecture — component design, state management, and design-system consistency across web, iOS, Android, and Windows clients.
- Collaborated directly with the backend team (Go, Kubernetes) to design APIs and interfaces feeding the frontend; also personally architected and deployed those backend services.
- 40,445+ orders processed across all platforms; led a team of 5+ engineers with code review and design ownership.

Shiru Education — *Full-Stack Engineer* Client Project · UK · Remote

<https://www.shurieducation.com>

- Built a complete Next.js (App Router, SSR, TypeScript) frontend and admin panel for a UK-based consultancy, with a full CMS pipeline and SEO architecture.
- 142+ contact submissions and 10+ talent applications generated at launch.

The Offshore Lab — *Full-Stack Engineer* Client Project · Lagos & UK · Remote

<https://www.theoffshorelab.com>

- Built a complete web platform featured in TechCabal, Guardian, and BusinessDay — 10,000+ organic visitors since 2023, full TypeScript/Next.js frontend.

NodeX iHub — *Co-Founder & Embedded Systems Engineer* 2020 – 2023 · Warri, Nigeria

<https://www.nodexihub.com>

- Co-founded an embedded-systems and IoT product studio; built ESP32-based hardware (smart home devices, a farm irrigation automation system) generating real-time sensor telemetry, and the companion apps that visualized it.

EDUCATION

Federal University of Petroleum Resources (FUPRE), Warri 2017 – 2022

BSc Computer Science · 2nd Class Upper Honours

LANGUAGES

English — Native / Full Professional Proficiency

German — Learning

AVAILABILITY

 Open for Relocation — Stuttgart, Ulm, or Berlin  Full-Time  Available Immediately
