Port Harcourt, Nigeria · Open to Relocation — Berlin

Full-stack developer with 6+ years building production TypeScript/Next.js/Node.js applications end to end — from rapid prototypes to platforms serving 300K+ users. Shipped cross-platform desktop applications (Flutter, hands-on Electron experience) and built LLM-powered product features, including an in-app business analytics chatbot and AI-assisted form autocomplete for Lupply, the commerce platform I founded and lead. Comfortable owning the full development lifecycle — architecture, implementation, deployment, iteration — and translating business requirements from non-technical stakeholders into working software.

CORE SKILLS

Full Stack

TypeScript, Next.js, React — production web applications
Node.js / NestJS / Express — REST APIs, backend services
PostgreSQL, MongoDB, Redis — data modelling, caching
Docker, Kubernetes — containerisation and orchestration

Cloud & Deployment

GCP, AWS — cloud infrastructure and deployment
Vercel, Railway, Heroku — hosting and deployment
CI/CD — GitHub Actions, GitLab CI

AI / Agents & Desktop

LLM product features — in-app chatbots, AI-assisted form completion
Agent-style workflows integrated into production apps
Electron — desktop app development (hands-on)
Flutter — shipped cross-platform desktop application

Workflow & Collaboration

AI-assisted development — Claude, GitHub Copilot
Translating business requirements into working software
Team leadership — 5+ engineers, mentoring
Ownership of full lifecycle: idea to production

EXPERIENCE

Lupply — *Founder & Engineering Lead* 2019 – Present · Remote

<https://lupply.com>

- Founded and led a commerce SaaS suite (POS, marketplace, food delivery, logistics) — TypeScript, React, Next.js, Node.js, Go — deployed across web, iOS, Android, and Windows.
- Built an in-app chatbot feature giving business owners quick analytics on their operations, and AI-assisted autocomplete for form-filling across the platform — both LLM-powered features shipped to production.
- Owned the full development lifecycle from idea to production — architecture, implementation, deployment, and iteration — across a team of 5+ engineers.
- Translated requirements directly from business stakeholders and merchants into working features; integrated Paystack and Flutterwave payment gateways and built real-time delivery tracking.
- 40,445+ orders processed across all platforms.

Luna Finance — *Backend Engineer* Contract · Remote

- Designed REST APIs for a high-traffic fintech platform serving 300K+ users; reduced response times by 80% through query optimisation and caching.

Shiru Education — *Full-Stack Engineer* Client Project · UK · Remote

- Built a complete Next.js frontend, admin panel, and CMS pipeline for a UK-based consultancy, translating business requirements directly from a non-technical client into production software.

NodeX iHub — *Co-Founder & Embedded Systems Engineer* 2020 – 2023 · Warri, Nigeria

- Co-founded an engineering studio building hardware-integrated IoT products end to end; established CI/CD workflows and mentored junior developers.

EDUCATION

Federal University of Petroleum Resources (FUPRE), Warri 2017 – 2022

BSc Computer Science · 2nd Class Upper Honours

LANGUAGES

English — Native / Full Professional Proficiency
German — Learning
