Remote · Open to US / Canada

6+ years building and shipping fully-fledged SaaS products, multi-platform apps, and customer-facing web systems end to end. Proven track record of taking products from 0 to 1 — owning conception, architecture, delivery, and iteration. Led engineering teams of 5+, enforced code standards, and maintained CI/CD pipelines across TypeScript, React, Next.js, Node.js, Vue, and MongoDB stacks. Passionate about building software that creates real outcomes for real users.

CORE SKILLS

Frontend

- ▶ React / Next.js — expert level, production apps at scale
- ▶ Vue.js — component design, reactive state management
- ▶ TypeScript — strict typing, interfaces, generics
- ▶ Tailwind CSS, MUI, Theme-UI — responsive, accessible UI
- ▶ Flutter — fully-fledged iOS, Android & Windows apps

Backend

- ▶ Node.js / Express — RESTful APIs, auth, integrations
- ▶ MongoDB — schema design, indexes, aggregation pipelines
- ▶ Go (Golang) — REST APIs, WebSockets, complex business logic
- ▶ AWS EC2, Docker, Vercel, Heroku, DigitalOcean
- ▶ PostgreSQL, Redis

Product & Engineering Practices

- ▶ 0-to-1 product ownership — conception to production
- ▶ CI/CD — GitHub Actions, GitLab CI
- ▶ Code reviews, architecture decisions, standards enforcement
- ▶ SEO — Next.js App Router, metadata API, sitemaps, SSR
- ▶ Cross-functional collaboration — PMs, designers, clients

Tools & Workflow

- ▶ TypeScript everywhere — frontend and backend
- ▶ AI-accelerated dev — Claude Opus, GitHub Copilot
- ▶ Postman, Swagger — API design and documentation
- ▶ ClickUp, DB Diagrams, technical specification writing
- ▶ Team lead, mentoring, junior developer growth

EXPERIENCE

Lupply — *Founder & Engineering Lead* 2024 – Present · Remote

<https://lupply.com>

- ▶ Founded and led a team of 5+ engineers to build a fully-fledged food delivery and business management SaaS from 0 to 1 — POS system, delivery platform, restaurant management dashboard, online ordering, and CRM.
- ▶ Owned the entire product lifecycle: architecture decisions, roadmap planning, cross-functional collaboration with designers and business stakeholders, feature brainstorming, and iterative shipping.
- ▶ Enforced code standards and architecture decisions via code reviews across TypeScript, React/Next.js, Node.js, and MongoDB codebases; maintained CI/CD pipelines via GitHub Actions and GitLab CI.
- ▶ Shipped a fully-fledged cross-platform mobile app (iOS & Android) via Flutter and a dedicated Windows desktop app — all live in their respective stores.

[Google Play — Lupply Android App](#)

[Microsoft Store — Lupply Windows App](#)

- ▶ Stack: TypeScript, Next.js, React, Node.js, MongoDB, Express, Flutter, GitHub Actions.

Shiru Education — Full-Stack Engineer

Client Project · UK · Remote

<https://www.shurieducation.com>

- ▶ Took a UK-based international education consultancy from 0 to production — full frontend and backend covering 10 destination countries, service pages, blog, consultation booking, and career portal.
- ▶ Implemented SEO-optimised Next.js architecture (App Router, server components, metadata API, dynamic sitemaps) driving strong organic discoverability across all country pages.
- ▶ Platform generated 142+ contact submissions, 10+ talent applications, 8 client testimonials, and 6 published blog posts within the launch window — direct business impact.
- ▶ Stack: TypeScript, Next.js, Node.js, Cloudinary, custom CMS integrations.

The Offshore Lab — Full-Stack Engineer

Client Project · Lagos, Nigeria · Remote

<https://www.theoffshorelab.com>

- ▶ Built and shipped the complete web platform for an integrated services firm operating across Nigeria and the UK — featured in TechCabal, Guardian, and BusinessDay upon launch.
- ▶ Implemented SEO-optimised Next.js architecture; site has accumulated 10,000+ organic visitors since 2023 across project delivery, technology, and education service lines.
- ▶ Stack: TypeScript, Next.js, Node.js.

NodeX iHub — Co-Founder & Lead Engineer

2020 – 2023 · Warri, Nigeria

<https://www.nodexihub.com>

- ▶ Co-founded a technology learning hub; led a team of engineers and instructors, directed software projects, conducted code reviews, and drove engineering best practices across all internal products.
- ▶ Built the company website, student portal, and internal tooling; established CI/CD workflows (GitHub Actions) used across all projects.
- ▶ Mentored and grew junior developers — product managers and business leaders from this period would speak positively to cross-functional leadership and communication style.

Luna Finance — Backend Engineer

Contract · Remote

<https://lunarfinance.io>

- ▶ Collaborated with a cross-functional engineering team to architect and ship backend infrastructure for a high-traffic financial platform — \$1M+ in processed volume, 300K+ users.
- ▶ Implemented complex business logic, multi-service routing, and third-party API integrations; reduced API response times by 80% through query optimisation and caching strategies.
- ▶ Maintained CI/CD pipelines via GitHub Actions and GitLab CI; owned delivery end to end from spec to production.
- ▶ Stack: TypeScript, Node.js, REST APIs, GitHub Actions, GitLab CI.

EDUCATION

Federal University of Petroleum Resources (FUPRE), Warri

2017 – 2022

BSc Computer Science · 2nd Class Upper Honours

LANGUAGES

English — Native / Full Professional Proficiency
