

Collins Krubu

Full-Stack & Mobile Developer (Focus: IoT / Embedded)

 Berlin, Germany (Relocating)  collinskrubu723@gmail.com  github.com/collinpowell  Portfolio

BRIEF PROFILE (REMOTE & AUTONOMOUS)

A tech-savvy and results-oriented full-stack and mobile developer with over **4 years of verified experience** building end-to-end solutions, scalable architectures, and IoT/embedded systems. Strong focus on independent, remote development, automated deployments (CI/CD), and the seamless integration of hardware (C/C++) with modern web and mobile interfaces.

VERIFIED PROFESSIONAL EXPERIENCE & ACHIEVEMENTS

Lupply — Founder & Lead Full Stack Engineer January 2023 – Today | Remote

- End-to-end product development:** Sole development, architecture and provision of a production-ready platform (mobile & web) for a complete ecosystem (SaaS dashboard, food marketplace, online store).
- CI/CD & Automation:** Solely responsible for the entire CI/CD and deployment infrastructure – GitHub Actions, Fastlane for automated mobile releases (iOS/Android) and Docker containerization.
- Cross-system integration:** Building reliable data exchange layers between the web platform and native clients, including real-time GPS telemetry and payment processing.

Tech: Next.js, React, Node.js, Go, TypeScript, PostgreSQL, Docker, Fastlane, AWS

Live systems (verified):
Web App, App Store, Google Play

NodeX iHub — Co-Founder & Lead Engineer Jan 2020 – Dec 2023

- C/C++ Systems Integration (IoT):** Development of firmware in C/C++ on ESP32 microcontrollers (FreeRTOS) for smart home devices, automated farm irrigation systems and coin-operated machines – all connected to cloud services via MQTT/TLS.
- Hardware-software bridge:** Management of the complete data pipeline from the hardware to the cloud (sensor data acquisition, real-time telemetry, web dashboard visualization).

Tech: C/C++, ESP32, FreeRTOS, MQTT, Python, Next.js, Node.js

Live project (verified):
NodeX frontend

Lunar Finance — Backend & Performance Engineer 2025 – 2026

- Backend optimization:** Development of backend routing services for a high-traffic web application (multi-chain DEX aggregator) with over 350,000 active users and \$1 million in daily volume.
- High-performance:** Optimization of database queries and development of high-performance RPC indexers in Rust, which reduced latency in cross-chain transactions by 40%.

Tech: Rust, Go, Node.js, Redis, Web3 APIs

Shuri Education / The Offshore Lab / Pivot — Full Stack Developer Client Work

- Development of scalable enterprise web platforms, CMS systems, and backend APIs. Optimization of database queries and API response times to handle peak loads during launch phases.

Tech: Next.js, Node.js, PostgreSQL, Cloudinary, Vercel

TECHNICAL CORE COMPETENCIES

Mobile & Frontend: Flutter, React Native, Next.js, React, TypeScript, Tailwind CSS	Backend: Node.js, Go, Python, Rust, REST APIs, WebSockets
IoT & Hardware: C/C++, ESP32, FreeRTOS, MQTT	Databases: PostgreSQL, MongoDB, Redis, Time-Series DBs
DevOps & CI/CD: Docker, GitHub Actions, Fastlane, Vercel, AWS	

LANGUAGE SKILLS

English: Native speaker / Fluent (working language)
German: A1 – Active and intensive daily study with the goal of B1/B2

EDUCATION

B.Sc. in Computer Science	2020 – 2024
• Visa note: I have more than 4 years of verified professional experience in software engineering, which qualifies me for a visa as an IT specialist in Germany, regardless of my degree.
