

Collins Krubu

Staff Frontend Engineer & Platform Architect

 Munich, Germany (Relocating)  collinskrubu723@gmail.com  github.com/collinpowell

 Portfolio Website

SUMMARY

Frontend Platform Engineer with 4+ years of verified experience designing, scaling, and maintaining distributed frontend architectures. Sole architect of Lupply, a production-grade multi-platform ecosystem where I established the shared UI contracts, dependency strategies, and independently deployable web frontends. Deeply proficient in **React, TypeScript, Next.js**, and modern build tooling (Webpack/Vite). I treat frontend development as systems engineering—focusing on Developer Experience (DX), CI/CD pipelines for UIs, and cloud-native infrastructure (Docker/Kubernetes). I utilize Agentic Coding workflows to accelerate cross-team technical delivery without breaking runtime contracts.

PROFESSIONAL EXPERIENCE

Lupply — Founder & Lead Frontend Architect
Jan 2023 – Present

- Architected a distributed frontend ecosystem serving business operations, a food marketplace, and logistics tracking. Designed the runtime boundaries allowing each frontend application to be built and deployed independently while sharing a unified design system.
- Established cross-team UI contracts and shared dependency strategies, mitigating conflicts across the multi-platform frontend topology (Web, iOS, Android, Windows).
- Owned the end-to-end frontend build and deployment pipelines. Engineered automated CI/CD workflows (GitHub Actions, Fastlane) targeting cloud-native systems (Docker, AWS) to ensure reliable, zero-downtime releases.
- Drove frontend performance standards, optimizing Core Web Vitals, CDN delivery, and API payload efficiency across complex, dynamic dashboards.

Tech: **React, TypeScript, Next.js, Webpack, Tailwind CSS, Docker, GitHub Actions, AWS**

Live Independently Deployed Frontends:
Business Dashboard Marketplace App Consumer Store

Shuri Education — Lead Frontend Engineer
Client Work

- Designed the frontend architecture for a high-traffic UK-based ed-tech platform. Implemented scalable component libraries to ensure visual consistency across multiple educational modules.
- Led performance optimization initiatives to handle massive traffic surges during launch month, specifically tuning static asset delivery and React re-rendering bottlenecks.

Tech: **Next.js, React, TypeScript, Vercel (CDN Deployment)**

Live: **shurieducation.com**

NodeX iHub — Co-Founder & Full Stack Engineer
Jan 2020 – Dec 2023

- Led the engineering team in building an internal EdTech platform supporting 200+ concurrent users, setting frontend best practices and shaping the engineering culture.
- Integrated complex real-time data visualizations in React, subscribing to high-frequency IoT sensor data pipelines via WebSockets and MQTT.
- Mentored junior developers through pair programming and code reviews, driving a culture of clean code principles and pragmatic problem-solving.

Tech: React, JavaScript, Node.js, Cloudflare, WebSockets

Live: node-x-frontend.vercel.app

Additional Frontend Platforms — Lead Frontend Developer

Client & Personal Projects

- **The Offshore Lab:** Delivered scalable frontend interfaces for a Nigerian/UK integrated services enterprise using Next.js. (Live: theoffshorelab.com)
- **NodeX iHub:** Developed a high-performance EdTech platform frontend supporting 200+ concurrent users with real-time WebSocket UIs. (Live: node-x-frontend.vercel.app)
- **Pivot Technical:** Built core platform UI features for enterprise operations using React and Next.js. (Live: pivottechnical.com)
- **Primesources Limited:** Engineered the corporate web presence for a major Oil & Gas enterprise. (Live: psl-website-omega.vercel.app)
- **Derek Decor Global:** Built the digital storefront and service portfolio for a construction firm. (Live: derekdecor.org)
- **Findam:** Developed the frontend for a local services and freelancer marketplace. (Live: sabi-work-nine.vercel.app)
- **Cereloop:** Created the UI architecture for a dynamic tech community and event platform. (Live: deep-fusion-main.vercel.app)
- **Mama Luxury Homes:** Developed a luxury real estate digital portfolio platform. (Live: mlh-website.vercel.app)
- **Solvux:** Developed a cross-chain DeFi frontend supporting 50+ networks with complex state management. (Live: solvux-frontend.vercel.app)
- **Kitty Couture:** Built an intuitive wallet and digital collectible Web3 frontend in Next.js. (Live: kittycouturememe.com)
- **Minto NFT:** Designed and implemented a React-based NFT marketplace interface. (Live: minto-ui.vercel.app)
- **Snooker App:** Engineered a progressive web application for tracking snooker games. (Live: snooker-app.vercel.app)

TECHNICAL EXPERTISE

Frontend & Architecture: React, TypeScript, Next.js, JavaScript (ES6+)	Micro Frontends & Tooling: Webpack, Vite, Module Federation Concepts, Design Systems
Cloud & Delivery (CI/CD): AWS, Vercel, Kubernetes, Docker, GitHub Actions, Fastlane	Methodologies: Agile, Pair Programming, Agentic Coding Workflows

EDUCATION & VISA STATUS

- **German Visa Status:** I possess 4+ years of verified software engineering experience (verified via official Corporate Affairs Commission documentation), fully satisfying the requirements for the German IT Specialist Visa independently of degree equivalency.
