

Collins Krubu

Full-Stack Developer (Focus: Frontend & CI/CD)

 Berlin, Germany  collinskrubu723@gmail.com  github.com/collinpowell  Portfolio

BRIEF PROFILE (REMOTE & AUTONOMOUS)

Results-oriented full-stack developer with over **four years of verified experience** building scalable web and mobile applications. Strong focus on frontend technologies (React, Next.js, TypeScript), automated deployments (CI/CD), and the development of accessible (a11y) user interfaces. As a multilingual developer (Node.js, Go, Rust), I am characterized by an extremely quick grasp of new backend ecosystems (such as Java/Spring Boot). Accustomed to working completely independently and remotely in agile, cross-functional teams.

VERIFIED PROFESSIONAL EXPERIENCE & ACHIEVEMENTS

Supply — Founder & Lead Full Stack Engineer January 2023 – Today | Remote

- Frontend & UX:** Development of complex, responsive and accessible web and mobile dashboards (React, Next.js, TypeScript, Tailwind).
- CI/CD & Automation:** Solely responsible for the entire CI/CD and release pipeline using GitHub Actions, Docker and Fastlane.
- End-to-end architecture:** Conception and implementation of the entire software lifecycle, from user stories through pair programming practices (with external designers/testers) to production deployment.

Tech: React, Next.js, TypeScript, Node.js, Go, PostgreSQL, GitHub Actions, Docker

Live systems (verified):

Web App App Store

Lunar Finance — Backend & Performance Engineer 2025 – 2026

- Scaling & Performance:** Development of high-performance backend routing services for a DEX aggregator with over 350,000 active users.
- System optimization:** Use of Rust and Go for RPC indexers, which drastically reduced latency and automated system tests (unit/integration).

Tech: Rust, Go, Node.js, Redis, Web3 APIs

NodeX iHub — Co-Founder & Lead Engineer Jan 2020 – Dec 2023

- Cross-functional leadership:** Leading an agile team in the development of smart home and automation solutions (IoT).
- Data visualization:** Development of frontend interfaces (Next.js/React) for real-time visualization of sensor data and system states.

Tech: C/C++, MQTT, Python, React, Next.js

Shuri Education / The Offshore Lab / Pivot — Full Stack Developer Client Work

- Analysis of technical customer requirements and their transfer into scalable web applications (CMS systems, enterprise platforms).

- Ensuring code quality through reviews, testing, and close collaboration in an agile setup.

Tech: Next.js, Node.js, PostgreSQL, Vercel

TECHNICAL CORE COMPETENCIES

Frontend: React, Next.js, Vue, TypeScript, Tailwind CSS, Accessibility (a11y)

Backend: Node.js, Go, Rust, Python (quick learning curve for Java / Spring Boot)

Testing & QA: Unit testing, Playwright, CI/CD, code reviews

DevOps & Tools: Docker, GitHub Actions, Git, Vercel, AWS, Agile/Scrum

LANGUAGE SKILLS

English: Native speaker / Fluent (working language)

German: A1 – Active and intensive daily study with the goal of B1/B2

EDUCATION

B.Sc. in Computer Science

2020 – 2024

- **Visa note:** I have more than 4 years of verified professional experience in software engineering, which qualifies me for a visa as an IT specialist in Germany, regardless of my degree.
