

COLLINS KRUBU

Senior Blockchain & Full-Stack Engineer

collinskrubu723@gmail.com

+234 8107111396

github.com/collinpowell

Port Harcourt, NG · Remote Worldwide

6+ years architecting production-grade blockchain infrastructure and full-stack applications across DeFi, DEX aggregators, NFT ecosystems, and enterprise SaaS. Deep expertise in Solana/Rust, Solidity, and Next.js — with a track record of shipping complex, multi-chain systems end to end. Co-founder of a Nigerian tech hub. Available for full-time, contract, and consulting remote roles.

CORE SKILLS

Blockchain & Web3

- ▶ Solana — Rust, Anchor Framework, Jupiter API
- ▶ Solidity — ERC standards, OpenZeppelin, custom contracts
- ▶ DeFi / DEX architecture, multi-chain liquidity routing
- ▶ Cosmos SDK, Ethermint, Tendermint — custom chain deployment
- ▶ Hardhat · Truffle · Foundry

Frontend

- ▶ Next.js / React — expert level, production apps
- ▶ Flutter — iOS and Android mobile apps
- ▶ TypeScript, Tailwind CSS, MUI, Theme-UI
- ▶ HTML/CSS, responsive and accessible UI

Backend & Infrastructure

- ▶ Go (Golang) — REST APIs, WebSockets, complex logic
- ▶ Node.js / Express — APIs, auth, third-party integrations
- ▶ AWS EC2, Docker, Vercel, Heroku, DigitalOcean
- ▶ MongoDB, PostgreSQL, Redis

Tools & Workflow

- ▶ AI-accelerated development — Claude Opus, GitHub Copilot
- ▶ Postman, Swagger — API design and documentation
- ▶ ClickUp, DB Diagrams, technical specification writing
- ▶ Team lead, project management, junior dev mentoring

EXPERIENCE & PROJECTS

Lunar Finance — *Backend Developer* Contract · Remote

<https://lunarfinance.io>

- ▶ Architected backend infrastructure for a production cross-chain DEX aggregator supporting Solana, EVM chains, and bridging layers.
- ▶ Integrated Jupiter API (Solana's leading liquidity aggregator) and implemented multi-chain routing logic for best-price execution.
- ▶ Deployed Solidity smart contracts for EVM-side execution and Rust/Solana programs for on-chain Solana operations.

Solvux — *Sole Developer* Personal Project · Ongoing

<https://www.solvux.xyz>

- ▶ Designed and built a full cross-chain DeFi platform from scratch supporting 50+ blockchain networks — swaps, bridging, and advanced routing.
- ▶ Implemented institutional-grade multi-sig security and best-price execution algorithms.
- ▶ Stack: Next.js, Rust/Solana, Solidity, Node.js.

Shiru Education — *Full-Stack Developer* Client Project · UK

<https://www.shurieducation.com>

COLLINS KRUBU

Senior Blockchain & Full-Stack Engineer

collinskrubu723@gmail.com

+234 8107111396

github.com/collinpowell

Port Harcourt, NG · Remote Worldwide

-
- ▶ Built complete frontend and backend for a UK-based international education and relocation consultancy covering 10+ destination countries.
 - ▶ Delivered consultation booking flows, country guides, CMS integrations, and a responsive marketing site optimised for conversion.
 - ▶ Stack: Next.js, Node.js, Cloudinary, custom CMS integrations.

The Offshore Lab — *Full-Stack Developer* Client Project · Lagos, Nigeria

<https://www.theoffshorelab.com>

- ▶ Built the full web presence for an integrated services firm operating in Nigeria and the UK — covering project delivery, technology, and education.
- ▶ Site featured in TechCabal, Guardian, and BusinessDay; Stack: Next.js, Node.js.

Kitty Couture — *Solana Developer & Frontend Engineer* Client Project · Remote

<https://www.kittycouturememe.com>

- ▶ Built the website and Solana token infrastructure for a meme coin + NFT ecosystem, integrating the KITTY token smart contract with the Dream Girls Digital Collectibles NFT platform.
- ▶ Stack: Next.js, Rust, Solana, token deployment.

Lupply — *Founder & Sole Developer* Founder · Ongoing

<https://lupply.com>

- ▶ Designed and built an end-to-end food delivery and business management SaaS — POS system, delivery platform, restaurant management dashboard, and iOS/Android apps.
- ▶ Stack: Flutter, Next.js, Node.js, Express.

NodeX iHub — *Co-Founder & Lead Developer* 2020 – 2023 · Warri, Nigeria

<https://www.nodexihub.com>

- ▶ Co-founded a technology learning hub; directed software projects, managed junior developers, and instructed students in blockchain, Web3, and full-stack development.
- ▶ Built company website, student portal, and internal tooling.

Howell Network — *Project Manager & Blockchain Developer* Contract · Remote

<https://howell-chain.vercel.app>

- ▶ Built a custom blockchain on Ethermint, Tendermint, and Cosmos SDK; deployed full node on AWS EC2 and connected the chain to MetaMask.
- ▶ Managed project delivery end to end including specs, timeline, and technical documentation.

EDUCATION

Federal University of Petroleum Resources (FUPRE), Warri 2017 – 2022

BSc Computer Science · 2nd Class Upper Honours
