

Lupply

The business operating system for Niger Delta SMEs. Inventory, POS, online store, food delivery, gas delivery, hotel management, and logistics — in one app.

Mobile App — iOS & Android

Web Platform

3 Marketplaces

Live on Play Store & App Store

NSA '22 Eligible (Tax Exempt)

THE PROBLEM

Running a business in the Niger Delta shouldn't require 5 different apps

Most SMEs here still manage everything by hand. Paper receipts. WhatsApp orders. Phone-call dispatch. No inventory system. No analytics. No visibility.

Fragmented tools, fragmented revenue

Separate systems for POS, inventory, ordering, and delivery means data doesn't talk. Business owners fly blind.

No local delivery infrastructure

There's no reliable last-mile delivery platform built for cities like Warri, Asaba, or Sapele. Businesses either self-deliver or don't deliver at all.

Existing solutions are Lagos-first

Platforms like Bumpa and Sabi are built for Lagos and charge premiums that don't match Niger Delta budgets. None of them do food delivery or logistics.

Hospitality has no tools

Hotels and restaurants in this region have zero access to affordable management software — most still use physical logbooks.

80%

of Nigerian SMEs fail within 5 years, primarily due to poor operational management.

Source: 2019 MEDAN National Survey

One app that replaces five

Lupply gives any business — from a local restaurant to a hotel — a complete digital backend from day one. No technical knowledge needed.

LUPPLY

Core & Data Layer

Business Management & POS

Point-of-sale, inventory, and analytics. Beyond simple management, this creates a localized economic data layer across the informal sector, unlocking future credit-scoring.

Commerce

Lupply Store

Instant online storefront. List products, accept orders, manage fulfillment — no website or developer needed.

Food

Lupply Food

Food ordering marketplace with integrated delivery. Restaurants list menus, customers order, riders deliver.

Essentials

Lupply Gas

On-demand cooking gas delivery from verified local vendors. Order from your phone, get it delivered to your door.

Hospitality

Hotel Management

Room bookings, bar sales, equipment tracking, maintenance logs, expense management. Already deployed at Raymilton Hotel.

TRACTION

LUPPLY

We're not pitching an idea.

We're pitching a running business.

Logistics

Everything below is from our production database — real merchants, real orders, real money moved. All achieved with zero external funding.

Rider Network

Built-in rider management with real-time dispatch, route assignment, and delivery tracking across all marketplace verticals.

How Lupply makes money

DELIVERY SUCCESS RATE

42,473 of 42,556 orders delivered

Diversified revenue across subscriptions, commissions, and delivery fees — all recurring and scaling with merchant activity.

LUPPLY

SAAS SUBSCRIPTIONS

₦5,000/month

Starter plan — POS, inventory, analytics, e-commerce, invoicing, order management. Annual at ₦12,000 (33% savings).

Freemium tier available for onboarding

MARKETPLACE COMMISSIONS

3–10%

Per-order commission on Lupply Store, Lupply Food, and Lupply Gas transactions. Revenue scales directly with GMV.

Current GMV: ₦367M+ and growing

DELIVERY FEES

Per-trip delivery charges across all marketplace verticals. Revenue split between platform and riders.

USER PLATFORM FEES

₦200+

Flat convenience fee charged directly to the end consumer on every order placed through the marketplace.

ENTERPRISE / WHITE-LABEL

Custom deployments for larger businesses. Hotel management suite currently deployed at Raymilton Hotel with room bookings, bar POS, and equipment tracking.

MARKET OPPORTUNITY

NSA '22 Tax Exemption: As an eligible labeled startup, 100% of our generated revenue is

exempt from corporate income tax for up to 5 years, allowing us to reinvest heavily into growth.

41.5 million businesses.

Almost none have proper tools.

₦138T

Annual MSME contribution to Nigeria's economy. The Niger Delta's share of this is massively underserved by existing tech platforms.

96.7%

of Nigerian businesses are micro-enterprises — small shops, restaurants, market traders — with no digital infrastructure at all.

9 states

The Niger Delta region: Abia, Akwa Ibom, Bayelsa, Cross River, Delta, Edo, Imo, Ondo, Rivers. Major trade hubs across all of them.

Why start here?

We live here

Based in Warri, Delta State. We know the merchants, the roads, the market dynamics.

No real competition

Bumpa, Sabi, Chowdeck — all focused on Lagos and Abuja. The Niger Delta is open territory.

High density of trade

Warri, Port Harcourt, Benin, Calabar — some of Nigeria's busiest commercial cities, all underserved.

Smartphone adoption is rising

The region is increasingly mobile-first, ready for a platform like Lupply.

LANDSCAPE

Where we sit versus alternatives

Nobody else bundles all of this into one platform — especially not at our price point.

TEAM

Who's behind this

LUPPLY

Collins Osemudiamé Krubu

Founder & Lead Engineer

6+ years building across the full stack — from writing C++ firmware for ESP32 microcontrollers to deploying SaaS on AWS. Previously co-founded NodeX iHub, where I led B2G contracts for traffic infrastructure, built IoT hardware products, and ran STEM programs for 200+ students.

I solely architected, built, deployed, and maintain the entire Lupply ecosystem — 5 platforms, 3 marketplaces, mobile apps on both app stores, backend infrastructure, and the rider dispatch system.

Previous work: Shuri Education (UK), The Offshore Lab (Lagos/UK), Raymilton Hotel, and 120+ SME clients.

CAPITAL ALLOCATION

How we deploy capital

We run a lean operation. Every dollar or naira we raise goes directly into scaling merchant acquisition and building out our local delivery network.

Investor Advantage: Under the Nigeria Startup Act 2022, investors in Lupply are eligible for a **30% Investment Tax Credit** and 0% Capital Gains Tax upon exit.

Merchant acquisition (35%)

Boots-on-the-ground sales teams across Warri, Asaba, Benin, and Port Harcourt. We use targeted social ads and market activations to rapidly onboard local businesses.

Logistics expansion (25%)

Expanding our rider fleet. We provide rider kits (branded bags, helmets) and set up local pickup hubs in heavy commercial zones to keep delivery times under 30 minutes.

Infrastructure (20%)

Scaling our servers and databases. As transaction volume grows, we need rock-solid cloud infrastructure and SMS gateway capabilities to ensure zero downtime.

Team & ops (20%)

Bringing on dedicated marketing and business development leads. This covers workspace and communication tools while we hit our next growth milestones.

THANK YOU

₦367M in GMV. 42,000+ orders. 123 businesses.
All bootstrapped. All real.

With seed funding, we'll 10x our merchant base and become the default operating system for every SME in the Niger Delta.
